## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show "method 400" as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Specification*

2. The abstract of the disclosure is objected to because on line 18, "(230)" should be --(220)--. Correction is required. See MPEP § 608.01(b).

### *Allowable Subject Matter*

3. Claims 1-34 are allowed.
4. The following is an examiner's statement of reasons for allowance:

None of the cited references teach or suggest a method and system for transmit diversity signal comprises: a first signal generator adapted to generate a first signal based on the first data stream and the second data stream, the first signal including the first and second pilot; a second signal generator adapted to

generate a second signal based on the first data stream and second data stream such that the second signal is diverse relative to the first signal, the second signal including the first and second pilots. A close art to the present application by U.S. Patent 5,943,372 to Gans discloses a technique for improving reception at the receiver, wherein digital signals are modulated, amplified, and transmitted to two orthogonal polarized antennas, while phase shifting the first signal. However, Gans failed to teach the subject matter described above. Therefore, claims 1 to 34 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
